

What has become of fair-use? We are losing control of our homes, our lives, our freedoms, at an alarming rate! Preventing home users from recording TV/Cable/Satellite programming is infuriating. Isn't enough that advertising is encroaching into every aspect of life, including putting icons and running ads at the bottom of many programs on TV? I barely watch TV now due to all the advertising, preventing me from recording TV will simply mean that I stop watching it all together. I believe this is true of many TV watchers, though perhaps not even the majority, but are not large minorities to get representation?

Please don't allow the Broadcast flag to be implemented.
Thankyou --Tad
